

PEDRALI[®]
THE ITALIAN ESSENCE

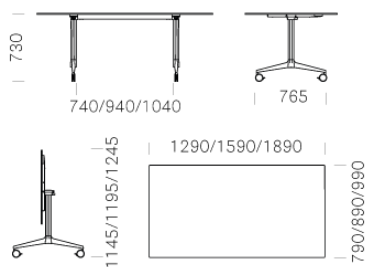

YPSILON TYT_800

DESIGN:
JORGE PENSI DESIGN STUDIO

The Ypsilon table, in its tilting and stackable version, is truly versatile and can become a working station, a meeting table, or a support for use in latest-generation co-working spaces. The top is connected with a die-cast aluminium base by an extruded aluminium column. A patented mechanism allows the top to be flipped over and moved from a horizontal to a vertical position through two well designed release handles, in red colour.
